Whitehall

26 February 1973

PERSONAL AND CONFIDENTIAL

The Prime Minister has asked me to let you know that he was very grateful for your letter of 18 February.

He very much agrees with you about the need for the Community to make a move forward in the monetary field. He thinks that the prospects for this have been improved by recent events. His impression is that a number of people in the Community are now more prepared to think big in this field - and he is in no doubt that thinking big is what we now require.
