17 November 1987

DOMESTIC RATES TO BE ABOLISHED IN MOST AREAS  
OF ENGLAND IN 1990

The Government has decided to introduce the Community Charge in one go on 1 April 1990 in all local authorities in England, except for the highest spending areas in London, Environment Secretary Nicholas Ridley told the House of Commons today.

In a small number of areas where spending is highest, either as a result of the Inner London Education Authority, or the Borough, or both, the Community Charge will be phased in over four years between 1990-1994.

For those high-spending areas every adult will pay a £100 Community Charge in 1990/1991 if spending is unchanged compared with the previous year. At the same time, households in those areas will pay a proportion of their rates. The proportion will decline steadily to zero over the following four years while the Community Charge will increase. For all other areas Community Charge will be introduced fully on 1 April 1990.

As previously announced there will also be a safety net, phased out over four years to limit the effects of the move to the new grant and business rate systems on Community Charge payers and ratepayers. It is now proposed, however, that there will be a maximum contribution to the safety net of £75 per adult in any area.

In a written answer to a Parliamentary Question from Jeff Rooker MP (Perry Barr), Mr Ridley said:

"The Government has given careful consideration to the arrangements for introducing the Community Charge in England in 1990/91, in the light of the many representations that have been made. There are two elements: the introduction of the community charge and abolition of domestic rates within each area; and the phasing-in of the impact of changes in grant and non-domestic rates on individual areas (safety netting).

"We have decided that the vast majority of areas should introduce the full, safety netted Community Charge in 1990/91; domestic rates will be abolished in those areas from 31 March 1990. However, in some areas where spending is particularly high either as a result of the Inner London Education Authority, or the Borough, or both, it would be too disruptive to introduce the new system in full in one go. That was the reason for our initial phasing-in proposals. In the light of comments on these proposals we have now decided to concentrate the phasing-in on these particular areas only.

This will give them more time to adjust their spending, while ensuring that the benefits of the new system will flow through more quickly elsewhere.

"In areas where local authorities have budgeted to spend more than £130 per head above their Grant Related Expenditure assessments in 1987/88, we propose that the Community Charge should therefore be introduced only partially in 1990/91 at £100 (assuming unchanged spending). Domestic rates there will be phased out and the full Community Charge phased in between 1990/91 and 1994/95. On this basis, the phasing-in would only apply throughout inner London, and in the London Borough of Waltham Forest.

"The safety net which we have already announced, will enable the effect on domestic taxpayers of changes in the grant and non-domestic rate arrangements to come through gradually. In 1990/91 the safety net will ensure that there is no change in the distribution of grant and non-domestic rates between areas, except that we now propose that contributions will be limited to a maximum of £75 per adult in any area. This will slightly reduce the extent to which areas are able to gain from the safety net. The safety net will be phased out in equal steps between 1991/92 and 1994/95."

"I have today placed in the Library tables illustrating the impact of these proposals on each local authority area, on the basis of 1987/88 spending."

#### NOTES TO EDITORS

Phasing out rates determines the speed at which the cost of paying for local services shifts between individuals in the same area (from, for example, single pensioner homeowners to those living in households with several adults). The phasing in of these grant and non-domestic rate changes determines how quickly changes in the overall amounts of domestic taxation (from domestic rates and the Community Charge combined) should occur.

The safety net will ensure that the grant and non-domestic rate changes are phased in over four years, rather than immediately, thus cushioning the impact of the new arrangements for areas which would otherwise have to raise more in total from their residents. So some authorities will benefit from the safety net, while others will contribute towards its cost. However, the maximum contribution which any authority must make to the safety net will be limited to £75 per adult. The attached tables show what these decisions mean for the residents of each local authority.

The Government has announced that certain people will be exempt from the Community Charge. They are: the severely mentally handicapped, old people living in homes, patients living in hospitals, and those in prison. For those on low incomes, there will be rebates of up to 80 per cent. Income support will assist those on the lowest incomes in paying the 20 per cent contribution. Students will pay 20 per cent of the charge in their college town.

Transitional arrangements for business rates were announced on 6 May 1987 (Press Notice No 212) and are not affected by today's announcement. The changes result from the revaluation of property and the introduction of the uniform business rate. The Government had initially proposed that the Community Charge should be phased in over four years throughout England, from 1 April 1990 (Press Notice 309, 30 July 1987).

In Scotland and Wales the Community Charge will be introduced in one go in all authorities - on 1 April 1989 in Scotland and on 1 April 1990 in Wales.

Footnotes

1. Local authorities in inner London and Waltham Forest will raise the remainder of their domestic taxation by levying a domestic rate.
2. A minus sign in Column 2 indicates a contribution to the safety net.
