FALKLAND ISLANDS - INSURANCE AND DEATH AND  
DISABLEMENT BENEFITS

The following general form of words can be used in response to any suggestion that the Government should be taking out special insurance cover for members of the armed forces in line with that which the merchant seamen's employers are understood to have taken out for them:

"The Armed Forces Pension Scheme naturally allows for the possibility of Servicemen being at war risk, and provides appropriate benefits for death or disablement in action. It therefore seems unnecessary to make any special arrangements for them in the present operation."

FALKLAND ISLANDS - VOICE OF "LIBERTY".

Background:

1. there have been press reports that a lady going by the name of "Liberty" has been broadcasting messages of pacifism and pro-Argentinian talk. The lady claims to be on the Falkland Islands.

PR Line:-

"On the best information we have, the Task Force have been able to hear these messages but due to atmospheric conditions prevailing at present no broadcasts have been heard recently.

We are not unduly concerned over these broadcasts. They may even give our sailors a bit of a laugh.
