CAPABILITIES OF THE ARGENTINE ARMED FORCES

Reference:

A. DCDS(I)/26 of 5 April 1982

1. There are a number of shortcomings in the Naval Forces Section of the redrafted paper - such as the absence of any reference to anti air warfare capability. A copy of the Naval Staff Assessment of the Operational Effectiveness of the Argentinian Navy was passed to DI57 yesterday and furthermore recent information has been forwarded to DI3N. CNS would be grateful if the paper could be further amended to reflect these inputs.
