CAPABILITIES OF ARGENTINIAN ARMED FORCES

1. CDS intends to consult with his counterparts in both USA and France to refine our intelligence on the numbers/range/performance/limitations etc of the various major weapons systems (ie submarines, Exocet, Mirage 3 and 5, Canberra, CVA, Lynx etc) currently in service with the Argentinian Armed Forces.

2. I would be grateful if you will let me know by 071200Z Apr 82 of any particular area of intelligence in which we would welcome a top grade American/French input.
