1/6SPG PAPER - MOONSHINE

COS should be aware that this project for a Broadcasting Stake based in ASI is in hand, ^{to be done in the UK & Arge.} Discussions with BBC indicate it is feasible to broadcast

- 4 hrs/day using BBC transmitter which we would need to requisition.

There are some reservations about this (!)

PM will not yet be aware of this.

BBC position may take some time to become clear, but we believe there is high-level support for it.
